DETAILED ACTION

1. This Office action is responsive to the following communication: Original Application filed on 11 March 2004.

2. Claims 1-88 are pending and present for examination. Claims 1, 7, 14, 22, 31, 36, 40, 42, 50, 53, 54, 60 and 64 are independent.

Election/Restrictions

- 3. This application contains claims directed to the following patentably distinct species:
 - Group 1: Claims 1-6 relate to a method for detecting attempted intrusions in a database application;
 - Group 2: Claims 7-13 relate to a method for detecting an anomalous command in a database application;
 - Group 3: Claims 14-21 relate to a method for detecting attempts to access a database application from invalid sources;
 - Group 4: Claims 22-30 relate to a method for detecting unauthorized activity in a database application;
 - Group 5: Claims 31-35 relate to a method for detecting activity designed to breach security
 of a database application;
 - Group 6: Claims 36-39 relate to a method for detecting suspicious activity in a database application;
 - Group 7: Claims 40-41 relate to a method for detecting use of keywords to suppress
 auditing of attacks in a database application;
 - Group 8: Claims 42-49 relate to a method for blocking attacks on database applications;
 - Group 9: Claims 50-53 relate to a method for detecting attempts to inject SQL into a database application;

Application/Control Number: 10/798,079

Art Unit: 2161

 Group 10: Claims 54-60 relate to a method for detecting malicious activity in a database application;

- Group 11: Claims 60-63 relate to a method for detecting activity which may result in crosssite scripting vulnerabilities;
- Group 12: Claims 64-85 relate to a method for detecting monitoring all activity for security auditing; and
- Group 13: Claims 86-88 relate a method for providing exceptions to security alerts.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

- 4. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
- 5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point

Application/Control Number: 10/798,079 Page 4

Art Unit: 2161

out supposed errors in the restriction requirement, the election shall be treated as an election without

traverse.

Should applicant traverse on the ground that the inventions or species are not patentably

distinct, applicant should submit evidence or identify such evidence now of record showing the inventions

or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if

the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may

be used in a rejection under 35 U.S.C.103(a) of the other invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should

be directed to Paul Kim whose telephone number is (571) 272-2737. The examiner can normally be

reached on M-F, 9am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Christian Chase can be reached on (571) 272-4190. The fax phone number for the organization where

this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application

Information Retrieval (PAIR) system. Status information for published applications may be obtained from

either Private PAIR or Public PAIR. Status information for unpublished applications is available through

Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at

866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or

access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
